Operating mechanisms: Manual push/pull, chain, gearbox, or electric motor-driven

Locking systems: barrel bolts, chain locks, or pin locks (combinations available for high security)

Professionally installed with operator training provided

Service plans available for regular maintenance and repairs

DESCRIPTION

Industrial Roller Shutter Doors are **custom designed and fabricated** for strength, durability, and security in demanding environments. Constructed from high-quality steel in thicknesses of **0.6mm, 0.8mm, or 1.0mm**, each door is manufactured to suit specific site requirements. A **powder-coated finish** is available in a wide range of colours to complement surrounding architecture.

Various **operating mechanisms** are offered, including manual push/pull, chain-driven, gearbox, and electric motor-driven systems—selected to match operational needs. Security options include **barrel bolts, chain locks, or pin locks**, which can be combined for maximum protection.

All doors are **professionally installed** with operator training provided. **Maintenance and service plans** are available to ensure continued smooth and reliable operation.

FEATURES

- ✓ Heavy-duty construction
- ✓ Custom designed and fabricated
- ✓ Available in multiple steel thicknesses
- ✓ Professional installation and training included
- ✓ Powder-coated finish - range of colours
- ✓ Manual or automated operating mechanisms
- ✓ Integrated high-security locking systems
- ✓ Optional service and maintenance plans

NOTES

Specifications are subject to change without prior notice. Performance is dependent on correct installation, use, and maintenance in line with manufacturer guidelines.
